Fahad Al-Mutairi

Technical Sales & Business Development · BI / Data Analytics Background

PROFILE

Software engineer turned commercial technologist with 5+ years spanning BI development, data analytics, and client-facing sales. I combine hands-on technical depth — Power BI, SQL, automation — with the ability to translate that into business value for stakeholders and clients. Founder of an Arabic AI SaaS platform, giving me end-to-end experience selling and shipping digital products in the Gulf market. I'm looking to bring this blend of technical fluency and commercial instinct into an IT/SaaS sales or solutions role.

EXPERIENCE

Software Engineer — Continental

2024 – Oct 2025

- Created and updated internal reports and tools based on business needs.
- Worked with SQL data and checked information to keep reports accurate.
- Used Power Automate and VBA to reduce repetitive reporting tasks.

Data & Reporting Analyst, Executive Office — ALHATHAL Construction

2020 – 2024

- Designed 20+ interactive Power BI executive dashboards supporting strategic decision-making.
- Partnered with stakeholders across departments to gather requirements and turn them into practical reporting solutions — a consultative, client-facing way of working.

Sales Consultant — Saudi National Bank (SNB)

2019 – 2020

- Consistently met and exceeded sales targets through data-driven client segmentation.
- Managed a portfolio of 200+ clients with a focus on service quality and retention.

SELECTED WORK

Nawah Labs — Arabic AI Platform (Founder)

Built and launched an Arabic AI SaaS product end-to-end: product, content, SEO, and monetization — direct digital-product sales experience in the Gulf market.

Power BI Sales & Revenue Dashboard

Interactive dashboard tracking revenue, KPIs, and regional performance, built with DAX and Power Query.

EDUCATION

Bachelor of Software Engineering

GPA 4.91 / 5.00

Coursework: Database Systems, Data Structures, Software Development, Business Analytics
